UNO.FARM

- MAXIMIZE PROFITS
- MINIMIZE RISKS
- SAVE TIME

Yield optimization platform for stablecoins on top of top DeFi protocols' liquidity pools

DEFI MARKET

DeFi attracted more than $106 billion deposits in just one year.

Most of that money is locked up in various protocols, bringing investors additional returns.

Cryptocurrency market capitalization already exceeds $2 trillion, and the market for DeFi sector is at the initial stage of its development.

Total Value Locked (USD) in DeFi

MISSION

Our mission is to bring together all the best yield sources in DeFi into one place. This will provide a unified interface to all of the major farms and liquidity pools, but also to automate routine tasks such as compounding, so that users can more and safer their yield even while not operating manually.

PROBLEM

Investments in DeFi offer much bigger returns compared to the classic bank deposits. Which makes them attractive for both experienced cryptocurrency holders and beginners.

But it has a number of risks and inconveniences:

Safety
- Dev projects can contain vulnerabilities, which can lead to hacks and other problems and thefts.
- Dev projects can be rugging, causing inconvenience for investors.

Profitability
- To optimize their yields DeFi users have to manually claim rewards from farms, sell them and yield farmers have to manually deploy their assets to where they will generate more APR.

Time consuming
- An effective approach to investing in Yield Farming requires constantly monitoring and spending a lot of time. Yield farmers are increasing new DeFi projects to their portfolios and managing their current portfolio.

Lack of access
- Current yield farming instruments do not have any way of messing with stablecoins, which makes their stable across or also.

Until now, DeFi has been unable to offer a solution that covers all of the these points.

ROADMAP & FEATURES

AGGREGATION

2021

Aggregating the best farming, lending and liquidity providing opportunities in one tool

AUTOCOMPOUNDING

2021

Compounding the profit formed at optimal intervals to maximize APY

SIMPLIFIED USER FLOW

2021

Take deposits with auto-conversion to LP allows users to invest in any connected protocols directly from the UNO interface just in a few clicks

PERSONAL PROFIT ANALYSIS

2021

Users get convenient analytics about their portfolio growth

MVP available at app.UNO.farm

NOW

INTELLIGENT MANAGEMENT

2022 Q1

Automatic switching between farms and different pools for highest yield

Automatically converting stablecoins to find the best pair

CROSS-CHAIN

2022 Q2

Automatically bridge the liquidity across the chains to access the best pools

Launch on:

Polygon	NOW	ETH Mainnet	
Fantom	NOW	Optimism	
Metis	NOW	Arbitrum	
BSC	NOW	Solana	

UNO B2B

2022 Q2

Ready-to-use staking solution for exchanges

UNISWAP V3

2022 Q3

Automatic Uniswap V3 strategy pools

FIAT GATEWAY

2022 Q4

Fiat gateway to allow fiat deposits and withdrawals

INSURANCE POOL

2023 Q1

Insurance pool to repay in case of any protocol failures

INHERITANCE MECHANISM

2023 Q2

Inheritance mechanism to prevent loss of access to funds

THE MAIN PLAYER ON THE DeFi MARKET

Future

The DeFi market is growing at a rapid pace and we're growing along with it. Thanks to our yield optimization, insurance, returns and risk management, we will take a key place in the new economy
